1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4569960 Blake.

Blake discloses a psa and method of making it which fall within the scope of the instant claims at the abstract; column 2, lines 42-68; column 3, lines 1-68; column 4, lines 1-18; column 7, lines 1-31; column 8, lines 1-31; the table of columns 11-12, particularly examples 73-75; and the patented claims.

4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 4569960 Blake.

Blake discloses a psa and method of making it which fall within the scope of the instant claims at the abstract; column 2, lines 42-68; column 3, lines 1-68; column 4, lines 1-18; column 7, lines 1-31; column 8, lines 1-31; the table of columns 11-12, particularly examples 73-75; and the

patented claims. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly claimed combinations of ingredients and amounts thereof in the psa of the patentee because they are encompassed by the patentee and would have been expected to give a psa having the properties of the psa of the patentee.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Niland whose telephone number is (703) 308-3510. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00.
